W02-P1: modify css to make books responsive

```

16 .book img{
17   width: 100%;
18   height: 250px;
19   object-fit: cover;
20   margin: 0 auto;
21 }
22
23 .book h1 {
24   font-size: 0.8rem;
25 }
26
27 .book h4 {
28   font-size: 0.5em;
29 }
30
31 @media screen and (min-width: 500px) {
32   .booklist {
33     grid-template-columns: repeat(2, 1fr);
34   }
35 }
36
37 @media screen and (min-width: 700px) {
38   .booklist {
39     grid-template-columns: repeat(3, 1fr);
40   }
41 }
42
43 @media screen and (min-width: 900px) {
44   .booklist {
45     grid-template-columns: repeat(4, 1fr);
46   }
47 }
48
49 @media screen and (min-width: 1100px) {
50   .booklist {
51     grid-template-columns: repeat(5, 1fr);
52   }
53 }
54
55 media screen and (min-width: 500px)
56
57 
```

The screenshot shows a code editor with a file named App.css. The code contains CSS for a booklist component, including styles for images, headings, and media queries for different screen widths. A red box highlights the style rule for the .book img selector. Another red box highlights the media query block starting at line 31.

The screenshot shows a browser developer tools component tree. Under the 'App' category, there is a 'ThreeBooks' node. Inside 'ThreeBooks', there are three entries labeled 'Book_46 key="1"', 'Book_46 key="2"', and 'Book_46 key="3"'. These likely correspond to the book cards displayed in the main browser window.

The screenshot shows a GitHub repository page for 'marx-w / 1121-WP1-demo-211410146'. The 'Files' tab is selected, showing the contents of the 'w02_46' folder. The 'w02_46.md' file is highlighted with a red box. The file content is identical to the one shown in the code editor above.

W02-P2: Share Github Repository to Teacher and Teaching Assistant.

The screenshot shows the GitHub repository settings page for 'marx-w / 1121-WP1-demo-211410146'. The 'Who has access' section is displayed, showing that the repository is public and has two direct access collaborators: 'Hsingtai Chung' and 'sian-0018'. Both users are listed as pending invites. A red box highlights the 'Manage access' interface.

W02-P3: Use <Booklist_46> to show all books in books_data array

The screenshot shows a React application running on localhost:3000. The code editor on the left displays a component named BookList_46.js. A red box highlights the code block where the component maps through the books_data array to render individual book components. The browser window shows five book covers: 'The Covenant of Water', 'The Lost Bookshop', 'One for the Blackbird', 'Never: A Novel', 'The Asset (A Lance Spector Thriller Book 1)', and 'We Walk in Darkness'. To the right, the Chrome DevTools Network tab is open, showing a call to 'BookList_46' with props including author, img, and title. A red box highlights the 'props' object in the DevTools.

W02-P4: Use useState hook to store all books in books_data.

The screenshot shows a React application running at localhost:3000. The interface includes a sidebar with navigation links like 'Components', 'Search (text or /regex)', and 'App'. The main area displays a grid of book covers. A red box highlights the first two books in the top row: 'The Covenant of Water' by Abraham Verghese and 'The Lost Bookshop'. Below this row are four more books: 'One for the Blackbird, One for the Crow' by Olivia Hawker, 'Never: A Novel' by Ken Follett, 'THE ASSET' by Bill Hiatt, and 'We Walk in Darkness' by Spell Weaver.

W02-Logs: All Logs.

```
> git log --pretty=format:"%h%x09%an%x09%ad%x09%" --after="2023-09-19"
